Shaping Poetry

The purpose of art is to give life a shape.

William Shakespeare, 1564-1616, English Poet.

Spanopoulos company has been active in the field of constructions and equipment of professional spaces for more than 25 years. We are always seeking perfection in every way, in every project.

Our company was founded by Kyriakos Spanopoulos in 1986. Originally, company's activities were directed towards furniture construction for household and professional equipment.

Due to our long experience and the guaranteed quality of our products, we gradually created a considerable clientele and focused exclusively on professional equipment. In 2001 the company acquired new headquarters with a privately owned ultramodern facility. Our objective, henceforth, is the creation of spaces with high aesthetic value and functionality, to meet the needs and desires of our customers. Through a great variety of materials, accessories and solutions, with the assistance of our specialists, each client can choose the best options for their individual professional vision. By providing integrated planning and construction services for professional spaces, shops and exhibition booths, Spanopoulos company distinguished itself from the rest of the market for the functional and aesthetic fullness of its products. Our company's success is based mainly on the highly specialized team of experts and professional experience, which guarantee personal approach to each project as well as the offering of creative, highly customized solutions.

Either you are starting your business today or you wish to make a complete renovation, Spanopoulos is offering you highly customized, easy to install, constructions of quality materials. The combination of quality and functionality maximizes the benefits of your professional equipment. The materials of each construction are chosen in accordance to its individual style, whether it is traditional or modern. We believe in creativity because our aim is the success of our customers.

And judging from our unique relationship with our clients we seem to have achieved our goal. For more than 25 years, we have been building solid personal and professional relations, by meeting the needs of our customers.

Thus, we are always on schedule, without delays and, most importantly, without sacrificing the quality of our products.

***In a stylish and functional environment,
the commodities become an intergrated part of the shop,
which guarantees customer satisfaction.***

High quality design maximizes the presentation,
the durability and the profit of the establishment.
However, design is becoming a more and more complicated matter.

Today, being a good professional is not enough. It is not enough anymore to conceive a good idea, to prepare a reasonable budget, to choose the materials, to offer technical advice and finally to supervise a project. Naturally, the planning should include all the above, but in our days another element is laso required, that of the interaction between the decorator and the customer. Professional design is not just a practical solution, but a planned proposal to specific requirements and expectations. Regardless of the type of the enterprise, the main objective of design is the functionality of the shop and the merchandise, but also the shop itself, with costly consequences far greater of those of investing in a quality and modern design. Moreover, the space in which we live and work is interrelated with our “quality of life”. Through this prism, the formation and the decoration of our working environment becomes of great importance.
